DETAILED ACTION

Allowable Subject Matter

Claims 1-34 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claim 1, which include an image taking apparatus having a zoom optical system that forms an optical image of an object with a variable magnification, the zoom optical system including an aperture stop in an optical path; a solid-state image-sensing device that has a photoreceptive surface on which the solid-state image-sensing device receives the optical image formed by the zoom optical system, the solid-state image-sensing device converting the optical image into an electrical image signal to output the electrical image signal; a shutter that shuts off with predetermined timing the optical image incident on the photoreceptive surface of the solid-state image-sensing device, the shutter being disposed on an optical axis of the zoom optical system, but at a different position from the aperture stop included therein, the shutter being kept stationary relative to the solid-state image-sensing device during zooming; and an optical member that has an optical

power and constitutes part of the zoom optical system, the optical member being disposed closer to the solid-state image-sensing device than the shutter is.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kidono et al teaches an automatic exposure control apparatus, but does not teach or suggest the claimed invention.
